Company Policy Handbook

Sample document for RAG (Retrieval-Augmented Generation) practice

1. Company Overview

BrightPath Solutions is a fictional technology company that provides software development, data services, cloud solutions, and technical support. The company operates with a focus on professional conduct, customer satisfaction, data protection, and continuous learning.

2. Working Hours and Attendance

Standard working hours are Monday to Friday, from 9:00 AM to 5:00 PM. Employees are expected to arrive on time and remain available during working hours. A lunch break of up to one hour is allowed between 12:00 PM and 2:00 PM, depending on team requirements.

Employees who expect to be late or absent should inform their team lead as early as possible. Repeated unexplained lateness may result in a performance discussion.

3. Remote Work Policy

Eligible employees may work remotely up to two days per week with prior approval from their manager. Remote employees must remain reachable through the company's approved communication channels and must attend scheduled meetings unless excused.

Company work must be performed on approved devices and secure internet connections. Employees should avoid accessing confidential company information on public computers.

4. Leave Policy

Employees may request annual, sick, or emergency leave through the company's leave process. Leave requests should normally be submitted at least three working days in advance when the absence is predictable. Emergency situations should be reported to the manager as soon as possible.

Managers review leave requests according to team workload, staffing needs, and applicable company rules.

5. Information Security

Employees must protect company accounts, passwords, documents, source code, customer records, and other confidential information. Passwords must not be shared with coworkers or stored in plain text in public locations.

Suspicious emails, unexpected login alerts, lost devices, or suspected security incidents must be reported to the IT or security team immediately.

6. Data Privacy

Customer and employee personal information should only be collected, accessed, or shared when there is a legitimate business reason. Employees must use approved systems when storing or transferring sensitive information.

Data should not be copied to personal cloud storage, personal email accounts, or unauthorized USB devices. Information should be retained only for the period required by company procedures.

7. Acceptable Use of Company Technology

Company computers, software, email accounts, and network resources are primarily provided for business activities. Limited personal use may be permitted if it does not interfere with work, create security risks, or violate company rules.

Employees must not install unauthorized software, disable security controls, attempt to bypass access restrictions, or use company systems for illegal activities.

8. Artificial Intelligence and Generative AI

Employees may use approved AI tools to support research, drafting, coding, analysis, and other work activities. AI-generated content must be reviewed by a human before it is used in business decisions or delivered to customers.

Confidential customer information, passwords, private employee information, proprietary source code, and other restricted information must not be entered into public AI tools unless the tool has been explicitly approved for that type of data.

9. Password and Account Security

Employees should use strong, unique passwords and enable multi-factor authentication where available. Shared accounts should be avoided. If an employee believes an account has been compromised, the password should be changed and the incident reported immediately.

10. Workplace Conduct

Employees are expected to communicate respectfully with coworkers, customers, vendors, and partners. Harassment, threats, discrimination, bullying, and abusive behavior are not acceptable in the workplace or through company communication systems.

11. Communication Policy

Official company communication should use approved email, chat, project-management, and meeting systems. Employees should keep work-related discussions professional and should avoid sharing confidential information in public channels.

12. Expenses and Purchases

Business expenses must be reasonable, related to company work, and supported by appropriate receipts or documentation. Employees should obtain required approval before making significant business purchases.

13. Equipment Policy

Company-issued laptops, monitors, phones, and other equipment remain company property. Employees are responsible for taking reasonable care of assigned equipment and reporting damage, loss, or theft promptly.

14. Employee Development

The company encourages employees to improve their technical and professional skills. Employees may participate in approved training, workshops, mentoring, and certification programs according to team requirements and available resources.

15. Performance Reviews

Employee performance may be reviewed periodically. Reviews can consider work quality, reliability, communication, teamwork, learning progress, and achievement of agreed goals. Managers should provide clear feedback and discuss areas for improvement.

16. Resignation and Exit Process

Employees who resign should follow the company's notice and documentation requirements. Before leaving, employees must return company property, transfer relevant work, and remove company data from personal devices or accounts where applicable.

17. Policy Questions

Questions about these policies should be directed to the employee's manager or the appropriate HR or IT team. Policies may be updated when business requirements, technology, or applicable rules change.

Practice note: This is a fictional company policy document created specifically for RAG practice. It contains multiple sections and distinct facts so you can test document loading, chunking, retrieval, and question answering.
